● Power adapter

Sirius 65W - Microsoft Bundle

Ultra-compact power adapter for Microsoft Surface and all other USB-C devices.

Index

Product overview

Thank you for choosing the **Einova Sirius 65W Universal Laptop Charger – Microsoft Bundle**! It's the **world's smallest power adapter** of its kind, **3x smaller** than standard power adapters. And it's both good for your devices and good for the planet thanks to Einova's patented **EcoVoltas™** power conversion architecture.

With its included 6ft 100W smart cable, Sirius 65W – Microsoft Bundle is perfect for your USB-C **Surface** devices, including Surface Go, Go 2, Pro 7, Pro X, and Surface Laptop 3. It's also compatible with **all other USB-C devices** requiring up to 65W, including other USB-C laptops, smartphones, tablets, headphones, speakers, cameras, drones, gaming consoles and more.

Sirius 65W is a must-have tech accessory for digital nomads, business travelers, and anyone else on the go. The charger easily fits into small spaces — slim laptop sleeves, hand luggage, even your pocket — thanks to its ultra-compact size, folding prongs, and detachable 6ft USB-C cable with built-in cable management system.

EcoVoltas™ technology: unbeatable energy efficiency

Designed and precision engineered in Italy at Einova's research and design headquarters (Modena, Emilia-Romagna), Sirius 65W features Eggtronic's patented **EcoVoltas™** power conversion architecture plus cutting-edge gallium nitride (GaN) power transistors to achieve the fastest, safest, most energy-efficient charging experience available on the market.

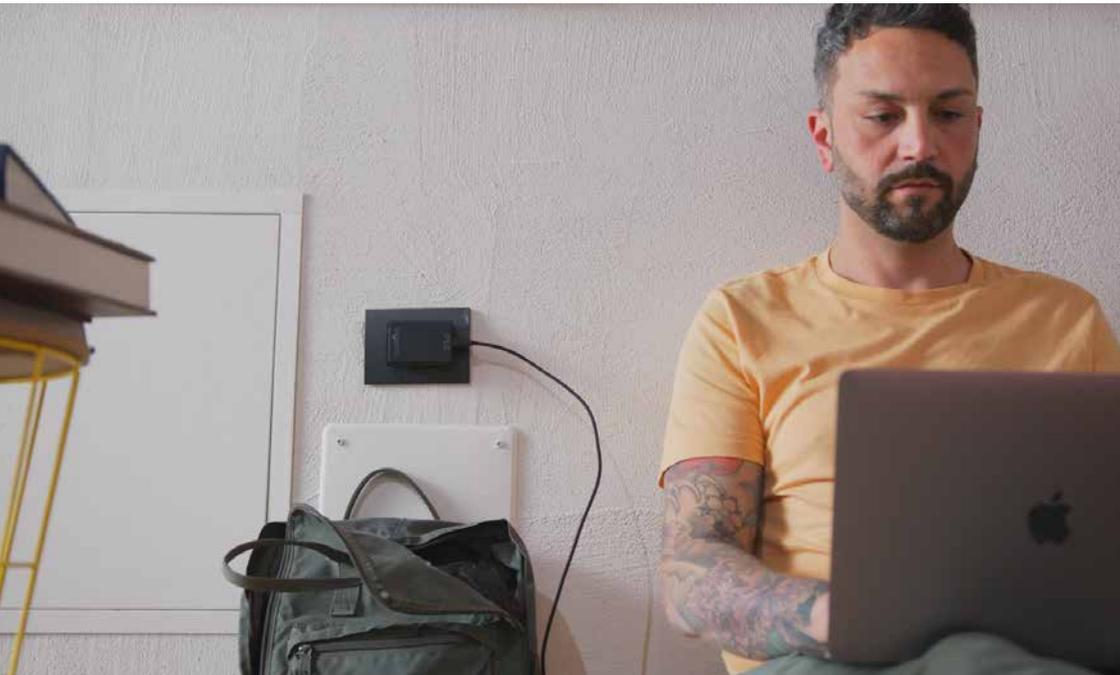

EcoVoltas

[1] Based on internal tests of Sirius 65W and the Apple 61W power adapter.

The benefits of GaN technology are well established. GaN is a major improvement over the previous generation of semiconductors made from silicon, and helps shrink a given charger's size, weight, and cost. However, other GaN chargers on the market are limited by the fact that they still use an old and inefficient power architecture.

Only Sirius 65W packs a one-two punch of GaN and EcoVoltas. The result is **unbeatable, best-in-class dimensions and energy efficiency**. Compared to other GaN chargers without EcoVoltas technology, Sirius 65W is **50% smaller in size** and **3% more energy efficient[1]**.

What makes Sirius 65W - Microsoft Bundle unique?

1

Universal and versatile: The robust 65W Power Delivery output can power your laptops, smartphones, tablets, action cameras, drones, gaming consoles and more.

2

Microsoft certified: Certified Designed for Microsoft Surface and compatible with Surface Go/Go 2/Pro 7/Pro X/Surface Laptop 3, and more. A 6ft smart cable (100W 480 Mbps USB 2.0) is included.

3

Eco-friendly with EcoVoltas™: Simplify your charging while reducing your carbon footprint. Sirius 65W's tiny dimensions, lightweight frame, and ultra-high energy efficiency rate are all possible thanks to the superior combination of EcoVoltas power conversion architecture and GaN power transistors. Speaking of efficiency...

4

World-leading 93% energy efficiency rate: 10% more efficient than standard adapters without EcoVoltas and GaN, including those by Anker, Aukey and RAVPower.

5

Savvy form factor: Perfect for travellers. Smaller and lighter than a deck of cards and with folding prongs that make Sirius 65W easy to take on the go.

6

Designed in Italy: A stylish and practical charging device for everyone that appreciates sleek, minimalist design.

7

Fast: Charges your iPhone 12 up to 30% in just 30 minutes.[2]

[2] Based on tests conducted under real-world conditions at Einova's research laboratories. Your charging performance may vary.

8

Advanced safety features that prolong the life of your device: Sirius 65W's cool running feature keeps internal charging temperatures 50% lower. The Power Delivery protocol's automatic device detection protects your connected device by detecting the load and automatically calibrating and delivering the correct voltage.

9

USB-IF certified: The USB Implementers Forum is an industry group that protects the safety and reliability of USB ports and cables. The rigorous certification process includes electrical tests for voltage ripple, transient states, and digital communication between charger and load, plus conformity to mechanical standards. Sirius 65W's USB-IF certification (**ID 41943**) means proven performance for power/data transmission far beyond the minimum required, for a reliable and safe charging experience now and in the future.

10

Other international safety and quality certifications: Not only USB-IF. Proudly certified as safe, reliable, energy-efficient and future-proof by the FCC, IEC, RoHS, California Prop 65 and US DoE Level VI Energy Efficiency; UL listed.

11

1-year limited warranty and lifetime customer support: With 24/7 support by phone, live chat, or email, Einova stands by its products.

What specifically to look for

1

Folding prongs: The prongs tuck away laterally when not in use, saving space making Sirius 65W ultra-easy to carry. And they'll never snag on items in your bag or awkwardly poke through fabric.

2

Premium 6ft 100W smart cable: USB-IF certified 100W 5A 480 Mbps USB 2.0 smart cable is equipped with E-Marker smart circuitry that communicates with the charger and laptop to provide information about cable specifications, manufacturer and more. Braided with nylon for durability and strength. The cable is completely detachable, and thanks to the double-sided hook and loop fastener, cable management is a breeze.

3

Low-profile body design: Hate it when your power adapters fall out of the socket? We do, too. Sirius 65W's flush-to-the-wall body design ensures that it always remains perfectly balanced in the wall socket.

4

Business travel and office ready: A second benefit of the slim profile — it's easy to take advantage of those outlets located in narrow spaces behind furniture.

5

Anti-fingerprint coating: Especially formulated by Einova product designers so that the charger always appears matte and as clean as the day you opened the package.

Compatibility

Sirius 65W and the included 100W USB-C to USB-C smart cable are compatible with all **USB-C devices** that require 65W or less of power input, including MacBook Air, MacBook Pro, other USB-C laptops, smartphones, tablets, Bluetooth devices, action cameras, drones, gaming systems and more.

Certified **Designed for Microsoft Surface** and compatible with USB-C Microsoft Surfaces devices, including Surface Go/Go 2/Pro 7/Pro X/Surface Laptop 3.

How to use

1

Insert the included USB-C cable into Sirius 65W's USB-C port.

2

Open the folding prongs correctly and then plug Sirius 65W into a power outlet.

3

Insert the other end of the USB-C cable into the charging port of your laptop or any other compatible device.

Specifications

Valet Tray:
Dimensions:
2.71 x 1.99 x 0.78 in (6,9 x 5,07 x 2 cm)
Weight:
95g
Input voltage:
100–240VAC, 50-60Hz, 1.5A
Output:
USB-C 5V3A, 9V3A, 12V3A, 15V3A, 20V3.25A, max 65W
Output power rating:
65W
Compatibility:
Universal (up to 65W)
Finish:
Black soft touch
Certifications:
FCC, UL, ROHS, level VI, USB-IF

Cable:
Braided nylon 100W 5A USB-C to USB-C cable 480 Mbps USB 2.0 (6ft)

Package includes:
Sirius 65W Universal Laptop Charger, braided nylon USB-C to USB-C cable (6ft) with double-sided hook and loop cable fastener, user manual.

USB-IF certification ID 41943

Availability

Sirius 65W Universal Laptop Charger is available in four variants: original black soft touch or gloss white, plus two bundles with unique features: Sirius 65W - Microsoft Bundle and Sirius 65W - Apple Bundle.

Authorized retailers include Einova.com, Amazon.com, and in stores including Target, Best Buy, Walmart, Home Depot, Office Depot, Staples, and more.

About Einova by Eggtronic

Eggtronic has been revolutionizing the world of power electronics and wireless power since 2012. Based in Modena, Italy, San Francisco, and Guangzhou, China, Eggtronic's specialized mechatronic and electrical engineers are creating the next generation of micro-sized, energy-efficient power conversion. More than 200 international patents have been granted worldwide to date.

Einova is the Eggtronic retail brand that unites Eggtronic innovations with premium Italian product design. Einova wireless chargers, power banks, and power adapters are sold in retailers throughout North America, Europe, and the Middle East and online at Einova.com. Whether for B2B partnerships or for today's discerning consumers, Eggtronic and Einova help make modern life easier, more efficient and more connected.
